

While You're Taking Care  
of Everyone Else...

# Who's Taking Care of You?

As women, we're expected to be many things to many people... companion, coach, referee, chauffeur, chef, confidante, caregiver, and the list goes on. In fact, sometimes the list gets so long, it's hard to find time to care for ourselves.

That's why here at Parker Adventist Hospital, we focus on innovative, timesaving ways to deliver total healthcare to women. Everything you need is right here, including all your specialty physicians, comprehensive one-day screenings and referrals, and a full-service diagnostic center featuring cardiac screening, diagnostic mammography, soft tissue ultra sound, bone density evaluation, and more.

The days of running around town to coordinate your healthcare services are over. You'll even find a state-of-the-art Women's Center with a wide range of classes, such as stress management, infant massage, Lamaze, managing depression, elder care, and many more. We invite you to experience a remarkably different kind of hospital. A hospital that focuses on wellness for women. A hospital dedicated to helping you care for yourself and your family—body, mind, and spirit.

**For physician referral  
or health advice, call our  
Health Advisor Line: 303-777-6877**
